T 575	Continued From page 1 recommendations of the Centers for Disease Control and Prevention for preventing the transmission of tuberculosis in facilities providing health care set forth in the guidelines of the Centers for Disease Control and Prevention as adopted by reference in paragraph (h) of subsection 1 of NAC 441A.200. 3. Before initial employment, a person employed in a medical facility, a facility for the dependent or a home for individual residential care shall have a: (a) Physical examination or certification from a licensed physician that the person is in a state of good health, is free from active tuberculosis and any other communicable disease in a contagious stage; and (b) Tuberculosis screening test within the preceding 12 months, including persons with a history of bacillus Calmette-Guerin (BCG) vaccination. If the employee has only completed the first step of a 2-step Mantoux tuberculin skin test within the preceding 12 months, then the second step of the 2-step Mantoux tuberculin skin test or other single-step tuberculosis screening test must be administered. A single annual tuberculosis screening test must be administered thereafter, unless the medical director of the facility or his designee or another licensed physician determines that the risk of exposure is appropriate for a lesser frequency of testing and documents that determination. The risk of exposure and corresponding frequency of examination must be determined by following the guidelines of the Centers for Disease Control and Prevention as adopted by reference in paragraph (h) of subsection 1 of NAC 441A.200. 4. An employee with a documented history of a positive tuberculosis screening test is exempt from screening with skin tests or chest	T 575
